

# Instant Pot Accessories

[March 11, 2016](#)

Listed below are items that can be used with the Instant Pot Pressure Cooker.

Any item that is "Oven Safe" can be used in the Instant Pot. You can use the following materials in your Instant Pot: Stainless Steel, Aluminum, Non-Stick Bakeware, Silicone Bakeware, and Oven Safe Glassware\*.

\*NOTE: Pyrex, Corningware & Anchor Hocking have not been tested & approved for use in pressure cookers. Plenty of people use them in the Instant Pot with no problems, but be aware that there is always a risk of breakage with any glass product.

Avoid "thermal shock"....don't place a hot dish on a cold surface or a cold dish on a hot surface. Place your bowl on a trivet to keep it off the bottom of the pot. If you see any cracks in your bowl do not use it in a pressure cooker.

---

The other consideration is "Will it Fit in the Instant Pot?".....

-The dimensions of the 5qt inner pot are 8.66" wide by 5.5" high so you can use accessories that are about 7" in diameter.

-The dimensions of the 6qt inner pot are 8.66" wide by 6.3" high so you can use accessories that are about 7" in diameter.

-The dimensions of the 8qt inner pot are 9.45" wide by 6.89" high so you can use accessories that are about 8" in diameter.

-The dimensions of the 3qt inner pot are 7" wide by 4.75" high so you can use accessories that are about 6" in diameter.

---

The items listed below will fit into the 6 & 8 quart Instant Pots. Most of them will also fit in the 5qt pot as long as they aren't too tall for it. The 5qt inner pot is about an inch shorter than the 6qt inner pot but they're the same width.
